estimating, or supervising the estimation of mineral resources, the relevant experience must be in the estimation, assessment and evaluation of mineral resources. If the competent person is estimating, or supervising the estimation of ore reserves, the relevant experience must be in the estimation, assessment, evaluation and economic extraction of ore reserves.

³ Actual assumed prices should be disclosed. It is not sufficient to refer to a “spot price”, without disclosing the actual price in question. Where the actual assumed prices used are said to be commercially sensitive, the entity must disclose sufficient information, perhaps in narrative rather than numerical form, for investors to understand the methodology it has used to determine these prices.

⁴ Estimates of metallurgical recoveries for each metal must be used to calculate meaningful metal equivalents. Reporting on the basis of metal equivalents is not appropriate if metallurgical recovery information is not available or able to be estimated with reasonable confidence.

Location/Confirmation

13. Where in the Offer Document is the separate table setting out the following information for material drill-holes (unless the entity determines that the information is not material):⁷

- easting and northing of the drill-hole collar;
- elevation or RL of the drill-hole collar;
- dip and azimuth of the hole;
- down hole width and depth; and
- end of hole (Listing Rule 5.7.2)?

See Section 4.3 and Appendices A-1, A-2, A-3 and A-11 of the CYIP IGR.

See Section 5.3.2 and Appendices B-1, B-2 and B-3 of the CYIP IGR.

The entity has determined that historical drill hole information referred to in listing rule 5.7.2 is not material given the nature of the deposit and resource type, the fact the CYIP has mineral resources but is on care and maintenance.

As the CYIP is on care and maintenance, and its value relative to the value of the entity's total assets (particularly its interest in Tshipi) is considered minor, historical drilling information in respect of the CYIP is not considered to be material.

14. Please enter "Confirmed" in the column to the right to indicate that the following JORC requirements have been satisfied:

- if the exploration results relate to mineralisation not classified as a mineral resource or ore reserve, then estimates of tonnages and average grade have not been assigned to the mineralisation except as an exploration target in accordance with JORC clause 17 (JORC clause 18);
- if true widths of mineralisation are not reported, an appropriate qualification has been included in the Offer Document (JORC clause 19);
- clear diagrams and maps designed to represent the geological context have been included in the Offer Document which include a plan view of drill hole collar locations and appropriate sectional views (JORC clause 19);
- there has been no selected disclosure of information such as isolated assays, isolated drill holes, assays of panned concentrates or supergene enriched soils or surface samples, without placing them in perspective (JORC clause 19);
- if the Offer Document includes exploration results based on rock chip or grab sampling, the location (represented as a table, diagram or map), total number and assay results for the sampling have been included for each sample so as to ensure samples are representative and not selectively reported (JORC clause 19 and JORC Table 1); and
- if the Offer Document reports visual results in the absence of assays, it does not include any reference to the grade or economic potential of the mineralisation (Example D in Annexure A of Guidance Note 8).
